

Sharon Glorya Putri Paingi

Jakarta, Indonesia | sharongloryaa@gmail.com | +6281351572961 | [id.linkedin.com/in/sharon-glorya-putri-paingi](https://www.linkedin.com/in/sharon-glorya-putri-paingi)

Motivated double degree student in Information Systems and Visual Communication Design with a strong interest in technology, digital innovation, and creative design. Experienced in project management, visual content creation, branding, and developing user-centered solutions by combining analytical thinking with creativity. Adaptable, collaborative, and eager to continuously learn and grow while leveraging both technical and creative skills to contribute effectively in dynamic environments and drive impactful results.

Education

Bina Nusantara University (BINUS) - S1 Information System (SI)	Sep 2023 — Present
Bina Nusantara University (BINUS) - S1 Visual Communication Design (DKV)	Sep 2023 — Present

Project & Achievements

Programming Workshop — Robotics & Arduino | 2022

Completed a one-month Robotics and Arduino programming training program focused on programming fundamentals, robotics systems, and hands-on project implementation. Recognized as Best Participant for outstanding performance, problem-solving abilities, and active participation during the program.

Freshmen Partner — First Year Program | 2024 - 2025

Mentored 5 first-year students for one academic year by providing guidance on academic adaptation, university requirements, and personal development. Assisted students in achieving one of their graduation requirements earlier through continuous support, progress monitoring, and effective communication.

Python Tutoring Class | 2025

Taught Python programming fundamentals to students from a lower academic batch within the same major. Facilitated learning through coding explanations, problem-solving sessions, and practical exercises to help students strengthen their understanding of programming concepts.

Booking Management Database System (Omnichannel) | 2025

- Designed and developed a database management system for room reservation processes across multiple booking channels
- Created database structures, entity relationships, and booking workflows using ERD concepts
- Implemented reservation validation and room availability processes to improve system efficiency

UI/UX Case Study: SehatYuk Mobile Application | 2025

- Conducted user-centered research and developed interface solutions for a healthcare application targeting young parents
- Created user flows, wireframes, and prototypes to improve accessibility and usability
- Designed interface structures focused on simple navigation and user experience optimization

System Testing & Implementation Project | 2025

- Conducted system testing and evaluation to identify errors and improve functionality
- Assisted in implementation processes and documented testing results
- Proposed improvements to optimize system performance

Project Management Project | 2025

- Planned project workflows, timelines, and task allocation
- Collaborated with team members to achieve project goals efficiently
- Monitored project progress and evaluated project outcomes

ChaynPay Fintech Branding Project | 2025

- Developed branding concepts and visual identity for a fintech payment solution focused on international transactions and remittance services
- Created brand personality, visual assets, and design concepts to strengthen brand communication
- Designed user-centered visual elements aligned with brand values and target audiences

Interactive Children's Illustration Book: Kota Solo | 2025

- Designed and developed an interactive children's illustration book consisting of visual storytelling and interactive elements
- Created illustrations, layouts, and engaging visual concepts to enhance children's learning experiences
- Applied storytelling and visual communication principles to improve audience engagement

Photography Project | 2024

- Created photography concepts using composition and visual storytelling techniques

- Produced and edited visual content using digital tools
- Applied lighting and composition principles for effective visual communication

Skills

Technical Skills

Database Management (SQL, MySQL)

- Create and manage databases
- Design database structures and relationships
- Perform basic data queries and analysis

Java Programming

- Object-Oriented Programming (OOP) principles
- Basic application development
- Problem solving and algorithm implementation

Python Programming

- Basic programming concepts
- Data structures and problem solving
- Debugging and code development

Project Management

- Coordinate project workflows and timelines
- Collaborate with team members effectively
- Monitor project progress and task completion

UI/UX Design

- Create user-centered design concepts
- Develop wireframes and prototypes
- Conduct basic user flow and interface planning

Design & Creative Skills

- Branding & Visual Identity
- Develop brand concepts and identity systems
- Create logo and visual assets
- Maintain visual consistency across media

Graphic Design

- Design posters, banners, presentations, and marketing materials
- Apply typography, color theory, and layout principles
- Create visual communication materials

Design Tools

Figma

- Wireframing
- Prototyping
- UI layout design
- Collaborative design workflow

Canva

- Social media content design
- Presentation design
- Marketing and promotional materials

Adobe Illustrator

- Vector illustration
- Logo creation
- Branding assets design

Adobe Photoshop

- Photo editing and retouching
- Image manipulation
- Digital design composition
